Not illustrated. 1907-01-01 Excerpt: .each month and during the entire year. and at the hour of the daily maximum temperature. In tabulating all thunderstorms which passed over Baltimore during a period of 28 years, a total of 678, we find the following distribution by months: Fio. 77.--The Frequency and Distribution of Thunderstorms. The diagram represents over 650 thunderstorms which passed over Baltimore In the 30 years from 1871 to 1900. The density of the shading Increases with the frequency of the storms, showing a maximum frequency between 3 p. m. and 5 p. m. In the month of July. For the hours of the day and month during which less than five storms were recorded In 30 years, the actual number Is Indicated by the small dots. The figures attached to the curved lines represent the total frequency in 30 years. Fio. 78.--The Average Monthly Frequency of Occurrence of Thunderstorms....

Reviews

This publication will never be straightforward to get going on looking at but really fun to see. This can be for all those who statte that there had not been a worth looking at. You wont really feel monotony at at any moment of your own time (that's what catalogs are for about should you request me).
