

Reconciling Planetary Diversity Through Transcultural Management

By Gebhard Deissler

GRIN Verlag Feb 2011, 2011. Taschenbuch. Book Condition: Neu. 210x148x2 mm. This item is printed on demand - Print on Demand Neuware - Essay from the year 2011 in the subject Cultural Studies - Miscellaneous, , course: Interkulturelles Management, language: English, abstract: The human, the physical as well as the consciousness cosmology are part of the totality of the universe. The Ancients have understood this principle and called it cosmos which means order. It is a hierarchical order, where the sun presides over the physical order in our solar system which in turn is hierarchically integrated in a galactic and those in turn in vaster systems. The various inner and outer cosmologies are part of the one life with its material and immaterial aspects and integrated, interdependent, hierarchical and synergistic order characterize it. This quality of order reigns between and within macro- and microcosmic planes. The continuity of them ensures the continuity of life. The biological, the physical and the consciousness cosmologies are diverse aspects of existence of life as a whole. In order to ensure the integrity of the planetary cosmology with its physical, biological and consciousness components cosmic order needs to be maintained. 36 pp. Englisch.

Reviews

A must buy book if you need to adding benefit. I am quite late in start reading this one, but better then never. Its been designed in an exceptionally easy way in fact it is only after i finished reading this publication where in fact modified me, alter the way in my opinion.

-- **Prof. London Gerlach**

It in a single of the most popular ebook. It really is simplified but excitement in the fifty percent from the pdf. It is extremely difficult to leave it before concluding, once you begin to read the book.
