

The Interaction of Compilation Technology and Computer Architecture

Filesize: 9.33 MB

Reviews

Absolutely essential read through book. it was actually writtern quite properly and useful. Its been developed in an remarkably basic way and it is only following i finished reading through this ebook where really changed me, modify the way i believe.

(Torrey Jerde)

THE INTERACTION OF COMPILATION TECHNOLOGY AND COMPUTER ARCHITECTURE

Springer Mai 1994, 1994. Buch. Book Condition: Neu. 235x155x22 mm. This item is printed on demand - Print on Demand Neuware - In brief summary, the following results were presented in this work: - A linear time approach was developed to find register requirements for any specified CS schedule or filled MRT. - An algorithm was developed for finding register requirements for any kernel that has a dependence graph that is acyclic and has no data reuse on machines with depth independent instruction templates. - We presented an efficient method of estimating register requirements as a function of pipeline depth. - We developed a technique for efficiently finding bounds on register requirements as a function of pipeline depth. - Presented experimental data to verify these new techniques. - discussed some interesting design points for register file size on a number of different architectures.
