The essays comprising this volume range expansively over questions of disciplinary taxonomy, pedagogical method and computer-assisted learning, doctrinal analysis, fact-finding, techniques of adjudication, the ethics of cross-examination, the implications of behavioural science research for legal procedure, human rights, comparative law and international criminal trials. Communicating the breadth, dynamism and intensity of contemporary theoretical innovation in their diversity of subject-matter and approach, the authors nonetheless remain united by a common purpose: to indicate how the best interdisciplinary theorising and research might be integrated directly into degree-level Evidence teaching. Innovations in Evidence and Proof is published at an exciting time of theoretical renewal and increasing empirical sophistication in legal evidence, proof and procedure scholarship. This groundbreaking collection will be essential reading for Evidence teachers, and will also engage the interest and imagination of scholars, researchers and students investigating issues of evidence and proof in any legal system, municipal, transnational or global. extremely useful for experts of both criminal and civil evidence, in any country within the civil law part of the world. Michele Taruffo, International Commentary on Evidence.
