

Why Us?: How Science Rediscovered the Mystery of Ourselves

By James Le Fanu

HarperCollins Publishers. Paperback. Book Condition: new. BRAND NEW, Why Us?: How Science Rediscovered the Mystery of Ourselves, James Le Fanu, The imperative to 'know thyself' is both fundamental and profoundly elusive -- for how can we ever truly comprehend the drama and complexity of the human experience? In 'Why Us?' James Le Fanu offers a fascinating exploration of the power and limits of science to penetrate the deep mysteries of our existence, challenging the certainty that has persisted since Charles Darwin's 'Origin of Species' that we are no more than the fortuitous consequence of a materialist evolutionary process. That challenge arises, unexpectedly, from the two major projects that promised to provide definitive proof for this most influential of scientific theories. The first is the astonishing achievement of the Human Genome Project, which, it was anticipated, would identify the genetic basis of those characteristics that distinguish humans from their primate cousins. The second is the phenomenal advance in brain imaging that now permits neuroscientists to observe the brain 'in action' and thus account for the remarkable properties of the human mind. But that is not how it has turned out. It is simply not possible to get from the monotonous sequence...
