Brand New Book ***** Print on Demand *****.Excerpt from The Fundamental Principles of Chemistry: An Introduction to All Text-Books of Chemistry Two tasks are set for the workers in any science. One of these is to enrich the chosen field by the discovery of new facts and the statement of new experiences. The other task is no less important, but its value is perhaps not so evident at first glance. It is to arrange the facts already known in the best order and to bring out the relations between them as clearly as possible. Whenever progress in the first of these tasks has been rapid the second becomes the more necessary, for it offers the only possible way of attaining mastery over the manifold separate experiences and of bringing the science as a whole into a convenient and serviceable form. The extraordinary development of the experimental side of the science of Chemistry has in some measure thrust into the background the work which has been done on the methodical side. This work has not been wholly lost, but an examination of the various theories...
