

Feature Extraction, Construction and Selection

Filesize: 5.96 MB

Reviews

This is basically the very best book we have go through until now. I have got read and i also am confident that i am going to gonna study once again again in the future. I am just very happy to inform you that this is basically the very best ebook we have read inside my own life and might be he very best publication for at any time.

To get **Feature Extraction, Construction and Selection** PDF, please refer to the link listed below and download the ebook or get access to additional information which might be have conjunction with **FEATURE EXTRACTION, CONSTRUCTION AND SELECTION** ebook.

Book Condition: New. Publisher/Verlag: Springer, Berlin | A Data Mining Perspective | There is broad interest in feature extraction, construction, and selection among practitioners from statistics, pattern recognition, and data mining to machine learning. Data preprocessing is an essential step in the knowledge discovery process for real-world applications. This book compiles contributions from many leading and active researchers in this growing field and paints a picture of the state-of-art techniques that can boost the capabilities of many existing data mining tools. The objective of this collection is to increase the awareness of the data mining community about the research of feature extraction, construction and selection, which are currently conducted mainly in isolation. This book is part of our endeavor to produce a contemporary overview of modern solutions, to create synergy among these seemingly different branches, and to pave the way for developing meta-systems and novel approaches. Even with today's advanced computer technologies, discovering knowledge from data can still be fiendishly hard due to the characteristics of the computer generated data. Feature extraction, construction and selection are a set of techniques that transform and simplify data so as to make data mining tasks easier. Feature construction and selection can be viewed as two sides of the representation problem. | Preface. Part I: Background and Foundation. 1. Less is More; Huan Liu, H. Motoda. 2. Feature Weighting for Lazy Learning Algorithms; D.W. Aha. 3. The Wrapper Approach; R. Kohavi, G.H. John. 4. Data-driven Constructive Induction: Methodology and Applications; E. Bloedorn, R.S. Michalski. Part II: Subset Selection. 5. Selecting Features by Vertical Compactness of Data; Ke Wang, S. Sundares. 6. Relevance Approach to Feature Subset Selection; Hui Wang, et al. 7. Novel Methods for Feature Subset Selection with Respect to Problem Knowledge; P. Pudil, J. Novovicová. 8. Feature Subset Selection Using a Genetic...
