This concept is also employed in piped water provision. The failure of some major projects suggests that there is considerable risk involved when the public and private sectors combine forces. The fact that piped water provision is a natural monopoly and therefore needs extensive regulation makes the cooperation between the public and private sector very difficult. Indeed, weak regulation is probably the most important risk factor. Other risk factors include political instability, inadequate tariff and contract design, and lack of public support. These risk factors are analyzed using four case studies, two failed ones and two that are considered relatively successful. The analysis aims to find answers to the question whether the initiative of development agencies to heavily promote the concept of public-private partnerships in water and sanitation is justified and appropriate. Ungenügende Regulierung ist möglicherweise der wichtigste Risikofaktor. Andere Risikofaktoren sind politische Instabilität, ein schlecht gestaltetes Gebührensystem, ein ungenauer Vertrag und fehlende Unterstützung der Bevölkerung und der Regierung. Diese...
